

# **MODERN TIERED BRICK WALL TABLETOP WATER FOUNTAIN WITH LED LIGHT DW-215**

Read the assembly instructions carefully and follow the care instructions.

Save these instructions for future reference.

**Select a smooth, level surface to place the fountain.**

**Assemble components of this fountain on a soft, clean surface to avoid scratching or damaging the finish.**

## **PREPARATION:**

Before beginning assembly, read all warnings and safety precautions.

## **⚠ WARNINGS & CAUTIONS:**

### **WARNINGS:**

To reduce the risk of electric shock, only connect the pump to a Ground Fault Circuit Interrupter (GFCI) outlet.

Do not exceed the voltage shown on the pump.

Always disconnect the pump from the power source before performing any maintenance or work on the pump, light(s) or any fountain fittings.

Inspect the pump and power cord for damage before installation and maintenance. If damage is found, the pump should be replaced.

### **CAUTIONS:**

Use a proper power source as indicated on the pump label. Keep the cords away from high temperatures and heat sources.

Do not lift the pump by its power cord.

Keep the fountain out of reach of children.

Do not let the pump run dry. The pump must be completely submerged for proper operation and cooling.

Do not pump heated liquids.

Operate with freshwater only. Avoid heavily chlorinated water and water with high PH levels.

Do not use harsh chemicals such as bleach to clean the fountain or pump.

## **ASSEMBLY:**

**NOTE:** The water tubing is built into the fountain. Take care when handling the water tube; detaching the water tube from the fountain will damage the fountain and void the product warranty.

1. Connect the short cable on the pump to the LED light cord that is inside the fountain. If the cords are already connected, check connection and tighten the plastic collar. Connect the pump to the water tube and place the pump inside the fountain.
2. Run the pump power cord out the back of the fountain. Align the cable with the groove in the access panel cover, as shown.
3. Twist the access panel cover to secure it to the back of the fountain.
4. Fill the fountain with enough water to keep the pump fully submerged during operation, approximately 5 cups.
5. Connect the AC adapter to the power cord and plug it into a properly grounded GFCI outlet.

**Note:** When first used, there may be air in the pump.

It may take several minutes for trapped air to escape, allowing water to flow.

# **IMPORTANT INFORMATION**

## **USE & CARE**

- For indoor use only.
- Keep fountain out of reach of children and pets.
- Keep power cord away from all heat sources. Do not place electrical cords in areas with high temperatures.
- Check the water level frequently to ensure the pump remains fully submerged; never allow the pump to run dry as it will burn out the motor.
- Only use water in this fountain; distilled water is recommended to prevent mineral buildup.
- Periodically change the water to keep the water, fountain and pump clean. Remove scale and buildup regularly.  
DO NOT use harmful additives such as bleach, chlorine, etc.  
DO NOT use anything abrasive to scrub the fountain.
- Always shut off the power supply before cleaning and maintaining the fountain and the recirculating pump.
- Take care when handling the pump; only pick it up by the body of the pump, never the power cord.

## **TROUBLESHOOTING**

- Ensure the pump is fully submerged under water. Add water to the basin as necessary.
- Check to make sure the power outlet is working; if in doubt about electrical connections, consult a certified electrician.
- Check the pump and tubing for obstructions.
- Check the flow control on the body of the pump as it may need to be adjusted to achieve the desired flow rate.
- If the light is not working, ensure the cables are fully connected and the seal is adequately tightened (do not over-tighten).
- If water is not flowing within several moments of the fountain being plugged in, unplug the power supply for a few moments and plug it back in. The pump may have air bubbles in the filter, which can prevent water from circulating properly.

**Any modification to the product or failure to follow recommended care will void the product warranty.**
